

SCOR's aim, as an independent global reinsurance company with worldwide operations, is to develop its Life and P&C business lines, to provide its clients with value-added solutions and to pursue an underwriting policy based on profitability, through effective risk management and a cautious investment policy. In this way, SCOR offers its clients an optimal level of security and creates value for its shareholders.

Play a role in shaping our future as a

Senior Life Actuary (f/m)

The Senior Life Actuary coordinates and provides input to processes related to the best estimate valuation of the Group's life portfolio for the Solvency II Economic Balance Sheet and related to data on the risk exposure of the Group's life portfolio for use in the calculation of required capital using the Group's internal model.

Your range of assignments:

- Initiate and coordinate data delivery to Life Risk Modelling, Life Pillar 3 and other teams
- Analyse sources of economic profit and loss
- Prepare and provide reports according to Solvency II requirements
- Provide detailed and in-depth validation of the actuarial modelling carried out by local life modelling teams
- Analyse and present projected cash flow and risk data to develop relevant and clear management information
- Develop and implement guidelines, controls and governance
- Support development and documentation of the processes of the team and of the Group

Are you interested in career opportunities in a dynamic environment within a fast paced, progressive and expanding company?

Yes? – Then please send your application in confidence to:
