

This abstract summarises the report on findings „IFRS 17 für die Krankenversicherung in Deutschland“ which was approved by the DAV committee *Rechnungslegung und Regulierung* on 29.05.2020. The complete publication in English language is available [here](#).

IFRS 17 for German health insurance

This report deals with the interpretation and application of IFRS17 on German health insurance contracts and concerns actuaries that prepare or audit IFRS financial statements.

This report addresses contracts that are subject to the international reporting standard IFRS 17 *Insurance Contracts*. The application of IFRS 17 is compulsory for group reporting under IFRS. This report is written in English because it particularly addresses international and capital market oriented companies.

The report is addressed to actuaries and is focused on providing an overview of the current state of discussions and the insights gained in the sub-working group. It is not a professional position of the DAV and is meant to support actuaries in actuarial teams.

The German Association of Actuaries (Deutsche Aktuarvereinigung or DAV) is the professional body representing actuaries and Appointed Actuaries in Germany. It creates the underlying conditions enabling its members to practice their profession properly and in a technically sound manner as well as engaging in constant dialogue with all relevant national and international institutions.

Reports on findings are summaries of the results of work carried out by DAV committees or working groups,

- where their application can be freely decided upon within the framework of the code of conduct,*
- that should inform discussion of the current opinion among actuaries or also among the broader public.*

As working results of a single committee, they do not, for the time being, represent any recognised position within the DAV and do not comprise any actuarial standards of practice. In this respect they are clearly distinguishable from any standards of practice.
